Forecast for Sunday 27 Jun 2021

Weather: Cloudy overnight with a few clear spells, however cloud increasing from the south during the early hours with it becoming mostly overcast by dawn, cloud low enough to give some hill fog. Overcast most of Sunday morning with the cloud thick enough to give the odd light shower from mid-morning over the Brecon Beacons. Rain moving more body northwards during the afternoon with rain reaching the area from mid-afternoon. The rain is likely to become persistent with some heavier bursts possible into the evening.

Chance of cloud free mountain/hill tops above 600m: 40%, increasing to 60% from late morning before reducing to 30% from mid-afternoon.

Visibility: Generally good below 400m but with cloud bases from 400m during the morning visibilities near summits will be poor. The cloud bases should lift a little from mid-morning towards 500-600m, however sudden deteriorations are possible in any showers. Visibilities deteriorating more generally from mid-afternoon becoming poor to moderate in rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A cloudy but dry start is expected however with rain, locally heavy moving north during the afternoon, wet weather gear is highly recommended. Together with low cloud and a freshening wind, navigation and walking conditions will become difficult during the day.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 25 Jun 2021	2.4mm	2.6mm	2.6mm

Forecast for Monday 28 Jun 2021

Weather: Cloudy with rain, locally heavy slowly easing during the morning. Conditions improving somewhat during the afternoon, however showery outbreaks are still possible. Cloud breaking up a little during the afternoon offering a brighter finish to the day.

Maximum wind: Northeasterly 15 to 20 mph, gusting 25-30mph, wind easing from late morning.

Chance of cloud free mountain/hill tops above 600m: 10% increasing to 60% from mid-afternoon.

Visibility: Low cloud and rain will give poor visibilities across the area during the morning. Cloud bases lifting to 600-700m during the afternoon, visibilities should generally improve. However sudden deteriorations are possible in any showers.

Temperature: **Valleys:** Plus 11 Celsius rising to plus 16 Celsius.
At 600m: Plus 8 Celsius rising to plus 12 Celsius.
Freezing level: Above summits.
